

Experimental median activity–abundance residuals

GCK: 463 residues
Spearman's rho = -0.48

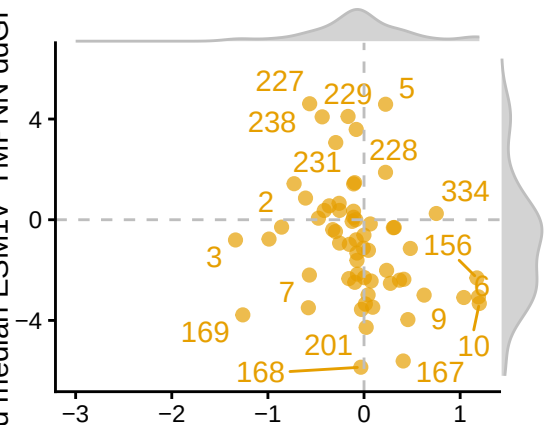

Experimental median activity–abundance residuals

45 Active sites
Spearman's rho = -0.05

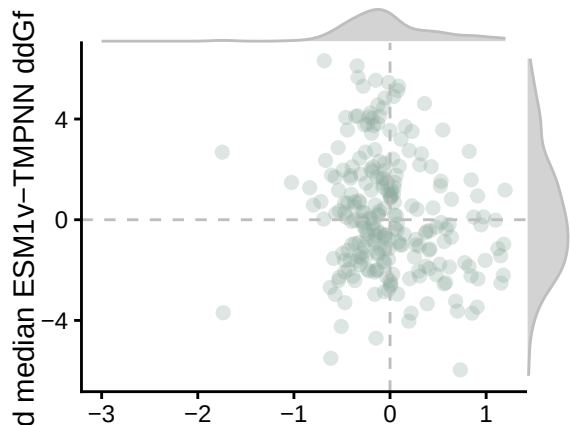

Experimental median activity–abundance residuals

22 Binding sites
Spearman's rho = -0.60

Experimental median activity–abundance residuals

396 non-orthosteric sites
Spearman's rho = -0.41

Experimental median activity–abundance residuals
